Re: Hamilton City Hall Renovation Project

Dear Sir

We have been very satisfied with Donalco's performance and professional approach at the Hamilton City Hall design build renovation project.

As spray fireproofing works subcontractor, Donalco, completed work on time and within budget and did an excellent job in working with our office and field staff to meet project requirements.

Donalco assisted our design team and with their diligence and knowledge ensured compliance with current codes and regulations.

I would not hesitate to recommend/hire Donalco for future projects.

Yours Truly

Scott Hunter
